Global Electricity Metering Market Dataset (2017 – 2027)

The global electricity metering market currently represents \$15.5 billion in annual investment, split between legacy metering, one-way communicating AMR meters, two-way communicating AMI meters, and commercial and industrial meters. Driven by growth in the AMI segment, annual investment in electricity metering will grow to \$20.3 billion by 2027. This dataset of over 48,000 data points covers 125 individual countries that comprise more than 98% of the global market. It projects the evolution of this market country-by-country with concrete quantitative data.

Compiled from Primary Sources

This dataset was compiled from primary sources. Northeast Group compiled primary sources from each of the 125 countries in order to build a bottom-up analysis of the global market. This ensures that the data is not a top-down estimate, compiled on a regional or global basis, but rather a country-by-country and segment-by-segment analysis that provides a detailed and exhaustive picture of the global market.

Data Split by Segment

The data is broken down into three primary segments, including 18 total lines of data for each country:

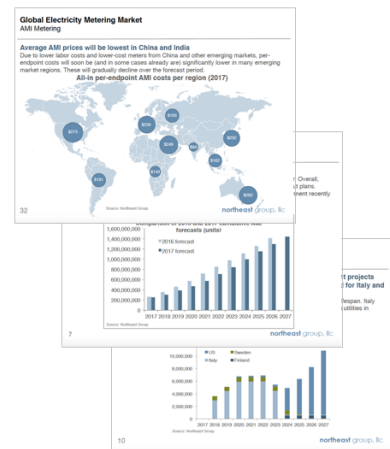

- Residential AMI meters, further split between RF, PLC, and cellular communications;
- Residential legacy meters;
- Commercial and industrial meters;
- For select countries, data on AMR meters is also provided.

Forecasts to 2027

Northeast Group has projected the electricity metering market out to 2027 for each of the 125 countries and for each segment of the market. These forecasts are compiled from primary source data run through Northeast Group’s proprietary forecasting models.

Excel Format Allowing for Customization, with PowerPoint Summary

The dataset is compiled in Excel, allowing for easy data manipulation and customization by clients. An executive summary 53-slide PowerPoint presentation is also included as part of the research package.
