Global Water Metering Market Dataset (2016 – 2026)

The global water metering market currently represents \$3.7 billion in annual investment. The market includes legacy metering, one-way communicating AMR meters, two-way communicating AMI meters, communications modules, commercial meters and industrial meters. Annual investment in water metering will grow to \$7.5 billion by 2026, driven primarily by growth in the higher value AMI segment. This dataset of over 30,000 data points draws on primary research and a bottom-up analysis, covering 125 individual countries that comprise more than 98% of the global market.

Compiled from Primary Sources

Australia	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025	2026

This dataset was compiled from primary sources. Northeast Group compiled primary sources from each of the 125 countries in order to build a bottom-up analysis of the global market. This ensures that the data is not a top-down estimate, compiled on a regional or global basis, but rather a country-by-country and segment-by-segment analysis that provides a detailed and exhaustive picture of the global market.

Data Split by Segment

The data is broken down into three primary segments, including 18 total lines of data for each country:

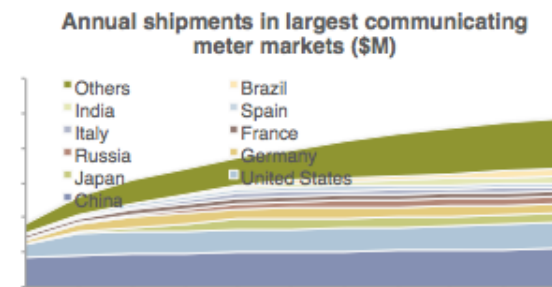

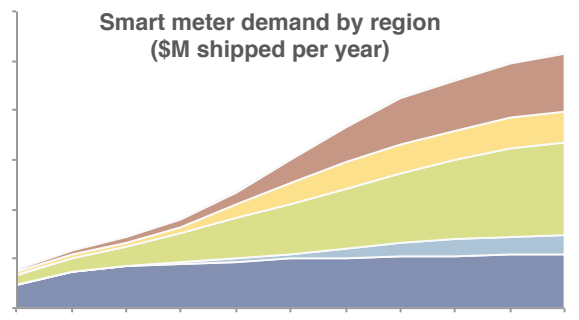

- Residential AMI meters;
- Residential AMR meters;
- Residential legacy meters;
- Commercial meters; and
- Industrial meters.

Forecasts to 2026

Northeast Group has projected the water metering market out to 2026 for each of the 125 countries and for each segment of the market. These forecasts are compiled from primary source data run through Northeast Group's proprietary forecasting models.

Excel Format Allowing for Customization

The dataset is compiled in Excel, allowing for easy data manipulation and customization by clients. An executive summary PowerPoint presentation is also included as part of the research package.
